

REMARKS

As the Examiner is aware, the present application is a Motorola "bulk filing" case. Special IDS procedures have been approved for these cases.

Applicants appreciate the indication of allowable subject matter. The claims have been placed in allowable format by incorporating the subject matter of the allowable claims.

Applicant is allowed to claim their invention broadly in the absence of prior art. In this regard, the specification as filed enables the subject matter of the currently pending claims, and Applicant respectfully requests the indication of allowed claims at which time the double patenting rejections will be addressed.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,  
MAIER & NEUSTADT, P.C.
